

1. Vypočítaj príklady. Rovnakou farbičkou vyfarbi dinosaurov s rovnakým výsledkom.

$12+3$

$15+1$

$20-2$

$19-4$

$11+7$

$17-1$

2. Dopln + alebo -.

$20 \square 4 = 16$

$7 \square 13 = 20$

$19 \square 2 = 17$

$8 \square 4 = 4$

$12 \square 5 = 18$

$3 \square 3 = 0$

$17 \square 3 = 20$

$9 \square 10 = 19$

$16 \square 2 = 14$

$5 \square 13 = 18$

3. Skontroluj a oprav nesprávne výsledky.

$13 + 3 = 17 \square$

$20 - 16 = 4 \square$

$12 + 5 = 16 \square$

$18 - 15 = 5 \square$

$16 + 2 = 18 \square$

$17 - 16 = 1 \square$

$17 + 3 = 19 \square$

$16 - 10 = 6 \square$

$10 + 9 = 20 \square$

$14 - 14 = 0 \square$

4. Porovnaj.

$16 \square 17$

$12 \square 11$

$19 \square 19$

$18 \square 14$

$15 \square 20$

5. Počítaj dinosauriu reťazovku.

$$\boxed{10} + \boxed{7} - \boxed{12} + \boxed{5} - \boxed{4} + \boxed{3} = \boxed{}$$
